

WELD SHEAR U-C 4 +S

BATTERY DRIVE FOR MAXIMUM FLEXIBILITY

The U-C 4 +S weld shear has been designed by the experts in Thermit® welding to be the optimal tool for shearing Thermit® welds. The U-C 4 +S guarantees a repeatable shearing process designed to shear through 1", Head Repair and Wide Gap welds with ease at a controlled speed. The shearing operation is performed with the simple touch of a button using a single EGO battery. Being battery powered, it removes the need for an additional hydraulic power source which helps improve the productivity of the Thermit® welding operation.

POWERED BY
EGO™

TECHNICAL DATA

SPECIFICATIONS

Dimensions (L x W x H)	33.3 x 17.9 x 12.6 in
Weight	99 lb (without battery, without shear blades)
Motor	Brushless DC Motor, battery-driven, powered by EGO
Battery	12 Ah / 56 V (1 x 12 Ah battery)
Rail type	Vignole rail
Gap width	Up to 2.75 in

BENEFITS

- Battery-driven allowing increased productivity for Thermit® welding operations
- Ideal for use in tunnels, confined spaces or locations with emissions requirements
- Speed controlled by the motor
- Independent of external hydraulic units
- Up to 40 shearing operations per battery charge
- Commercially available lithium-ion battery
- Battery charging time as fast as 75 minutes for 12 Ah EGO battery with EGO 700 W charger
- Multiple charging options available, including mobile charging

CONTENTS

- Weld shear U-C 4 +S

ACCESSORIES

- Shear blades based on rail size
- 12 Ah EGO lithium-ion battery
- Different battery charging options available
