

GOLDSCHMIDT

Smart Rail Solutions

LONG-LIFE CRUCIBLE

ECONOMICAL AND SUSTAINABLE

The long-life crucible is designed to be used several times. It ensures safe execution of the Original Thermit® weld, is cost-effective and also environmentally friendly. A tapping thimble, which opens for every Thermit® weld to be used, ensures a safe welding process. To increase the crucible volume for wide gap welds, a larger crucible extension ring is available.

TECHNICAL DATA

SPECIFICATIONS

Used for	All common rail profiles
Welding process	For most Original Thermit® welding processes
Gap width	Standard gaps, wide gaps

BENEFITS

- Cleaning the crucible lining after 15 castings on average
- All components of the long-life crucible system are available separately
- Low quantities of waste and therefore low disposal costs

ACCESSORIES

- | | |
|---|---|
| 1 Crucible extension ring (standard gap or wide gap) | 5 Long-life crucible (incl. tube of sealing paste 200) |
| 2 Crucible cap | 6 ATT-Elite applicator |
| 3 Tube of sealing paste 200 | 7 ATT-Elite thimble drift |
| 4 Clamping ring 29 | 8 ATT-Elite tapping thimble |
| | 9 Crucible holder |
