We are looking for a full-time employee as soon as possible:

FULL STACK SOFTWARE DEVELOPER (M/F/D)

....

YOUR TASKS

- Support for the new development and continuous further development of our innovative web products (frontend/backend) using a modern technology stack (including Angular, Java Spring Boot, Node.js, AWS Cloud Services)
- Optimisation of applications regarding usability, performance and long-term maintainability
- Designing, implementing and optimising SQL and NoSQL databases
- Planning and execution of software tests, creation of automated unit and E2E tests
- Assurance of high code quality through execution of internal team code reviews and creation of development documentation
- Proactive error management and ensuring the operation of web products
- Independent and agile collaboration with internal and external project partners
- Cooperating closely with the group's own development centre and our group companies worldwide

OUR OFFER

- Flexibility for mobile working (with periodic presence at our location in Leipzig)
- Challenging, exciting tasks with opportunities to incorporate own ideas
- Further education budget, specialised trainings
- Best possible freedom in the choice of the development environment: Mac, Linux or Windows
- Parking free of charge
- Company and team events, including company run, summer party and many more
