

GOLDSCHMIDT

Smart Rail Solutions

TSR BOARD

MAGNETIC RAILWAY SIGNS

INSTALLED AT THE SPEED OF LIGHT

TSR Board by Goldschmidt guarantees the quick and easy installation of signs for temporary speed restrictions. The product offers all the advantages of the popular Tracksafe Barrier (our magnetic track barrier). Without having to remove the ballast, the patented attachment system uses a magnet which enables its fast attachment and removal. The TSR Board always remains safely on the track, even in high-speed areas, and is also suitable for use in turnouts.

TECHNICAL DATA

SPECIFICATIONS

- Horizontal stanchion with two neodymium durable magnets and carrying handle
- Vertical aluminium pole with predrilled holes to connect signs
- Stanchion and pole can be separated
- Horizontal stanchion and made from hot-dip galvanized steel
- Weight stanchion: 14 kg
- Magnet can withstand a tensile force of 600 kg
- Bottom support leg has an extendable foot as a support, to accommodate different size ballast shoulders
- Optional locking-clamp against theft

BENEFITS

- Installation and removal much faster and easier than with other systems
- Savings of costs and time
- No damage to ballast bed and no change to standard ballast profile or to resistance of lateral displacement
- Easy, efficient and safe storage and transportation
- Network Rail product approval (PA05/05982)
